## Public private partnerships (PPP) in Indian infrastructural environment

**Ritu and Dr. Satish Chander Sharma**

### Abstract

Infrastructure is an essential quarter that each of us wishes to expand that allows you to attain normal development, however governments in growing nations have restricted assets for it. This has additionally been the case with India because of the gradual tempo of Indian monetary growth. To triumph over this challenge, the Government of India has been striving difficult to mobilise investments for infrastructure that allows you to double its GDP from 3.986% to nearly 9%. This means that nearly \$450bn may be the requirement to expand Indian infrastructure with inside the subsequent five years (2014-2019). However, thinking about the government's trouble to elevate such price range on its own, it has resorted to revolutionary exercise recognized as Public-Private Partnership (PPP) in various sectors. The paper objectives at imparting an perception approximately PPP in Indian infrastructural tasks whilst the second one a part of the have a look at evaluates the wonderful or poor effect of the prevailing Infrastructural tasks at the Overall improvement of the state so as to signify an efficient PPP Policy.

**Keywords:** public private partnerships, infrastructure, transportation, economic growth

### Introduction

A public-private partnership (PPP) is a central authority carrier or non-public commercial enterprise undertaking that's funded and operated via a partnership of presidency and one or extra non-public quarter companies. These schemes are occasionally called PPP, P3 or P3. Thus PPP refers to a long-time period contractual partnership among the private and non-private quarter agencies, in particular centered closer to financing, designing, enforcing and working infrastructure centers and offerings with inside the State. These PPPs purpose to reap the dual goals of excessive increase and fairness on a sustainable basis.

Pressure to alternate the same old version of public procurement arose to start with from worries approximately the extent of public debt, which grew hastily throughout the macroeconomic dislocation of the Nineteen Seventies and 1980s. In an aggressive international environment, governments round the sector had been that specialize in new approaches to finance tasks, construct infrastructure and supply offerings. Initially, maximum public-non-public partnerships had been negotiated individually, as one-off deals, and plenty of this interest started out with inside the early 1990s. In 1992, the conservative authorities of John Major with inside the UK delivered the non-public finance initiative (PFI), the primary systematic programme geared toward encouraging public-non-public partnerships.

### PPP in India

The Government of India defines a P3 as "a partnership among a public quarter entity (sponsoring authority) and a non-public quarter entity (a criminal entity wherein 51% or extra of fairness is with the non-public associate/s) for the advent and/or control of infrastructure for public motive for an exact length of time (concession length) on business phrases and wherein the non-public associate has been procured via an obvious and open procurement system. The union authorities has anticipated an funding of \$320 billion with inside the infrastructure with inside the tenth plan. The primary infrastructure improvement tasks with inside the Indian kingdom of Maharashtra (extra than 50%) are primarily based totally at the P3 version. In the 2000s, different states such as Karnataka, Madhya Pradesh, Gujarat, Tamil Nadu additionally followed this version.

## Classification of PPP- Sector wise

**Table 1: State Wise Project Details**

State	Total Number of Projects	Based on 100 crore	Between 100 to 250 crore	Between 251 to 500 crore	More than 500 crore	Value of Contracts
Andhra Pradesh	96	1,484.6	2,197.8	7,062.3	56,173.7	66,918.3
Assam	4	54.0	337.2	-	-	391.2
Bihar	6	77.6	-	769.6	1,246.7	2,093.8
Chandigarh	2	75.0	-	-	-	75.0
Chhattisgarh	4	70.0	304.0	464.0	-	838.0
Delhi	13	95.0	109.4	738.2	10,374.0	11,316.6
Goa	2	30.0	220.0	-	-	250.0
Gujarat	63	304.1	2,013.2	4,138.9	33,181.0	39,637.2
Haryana	10	125.0	180.0	270.0	10,588.1	11,163.1
Jammu and Kashmir	3	-	-	-	6,319.8	6,319.8
Jharkhand	9	131.0	550.0	398.0	625.1	1,704.1
Karnataka	104	1,080.4	1,942.6	13,136.3	28,499.6	44,658.9
Kerala	32	338.7	206.3	1,235.0	20,501.5	22,281.5
Madhya Pradesh	86	1,977.6	3,930.3	3,397.2	5,678.3	14,983.4
Maharashtra	78	742.3	2,988.4	2,433.7	39,427.6	45,592.0
Meghalaya	2	-	226.1	-	536.0	762.1
Orissa	27	235.1	211.0	1,473.0	11,430.6	13,349.7
Puducherry	2	-	-	419.0	2,947.8	3,366.8
Punjab	29	732.8	1,552.7	572.0	705.0	3,562.5
Rajasthan	59	633.9	783.8	1,100.8	12,508.8	15,027.3
Sikkim	24	175.6	558.0	2,669.0	13,708.0	17,110.6
Tamil Nadu	43	267.9	355.6	8,905.2	9,100.0	18,628.6
Uttar Pradesh	14	-	-	1,458.6	25,137.2	26,595.8
Uttarakhand	2	43.0	-	478.0	-	521.0
West Bengal	30	638.0	965.7	1,714.4	3,299.1	6,617.1

### Literature Review

Public Private Partnership: PPPs aren't new to India, the Great Indian Peninsular Railway Company running among Bombay (now Mumbai) and Thana (now Thane) (1853) become one of the first non-public ventures, the Bombay Tramway Company jogging tramway offerings in Bombay (1874), The Great Indian Peninsular Railway Company and the Power Generation and Distribution agencies in Bombay and Calcutta (now Kolkata) with inside the early twentieth century are a number of the earliest examples of PPP in India. Since the hole of the economic system in 1991 there were numerous careful and tentative tries to deliver investments via PPPs in India. However, maximum PPPs were confined to the roads quarter. In general, public government can recall PPP preparations in any of the subsequent circumstances. When:

- The venture can't be supplied with the economic assets or understanding of the general public quarter alone.
- A non-public companion might boom the first-class or degree of carrier over that supplied via way of means of the general public quarter on its own.
- A non-public companion might permit the venture to be applied earlier than if most effective the general public quarter were involved.
- There is aid from customers for the involvement of a non-public companion.
- There is a possibility for opposition amongst potential

non-public partners.

- There aren't any regulatory or legislative prohibitions to related to a non-public companion with inside the provision of a venture.
- The fee of the venture may be recovered via the implementation of person fees.
- The venture gives an possibility for innovation.
- There is a tune file of partnerships among authorities and the non-public quarter.
- There are possibilities to foster financial development.

### Objectives

- To examine Public-Private Partnership and its importance.
- To examine the effect of PPP on Indian Infrastructural projects.
- To examine Advantages and Disadvantages of PPP in India.

### Research Methodology

This is a conceptual Research with explorative methodology. The secondary data was collected from different sources like text books, research papers, articles, newspapers, internet etc. This study was made to have an insight of Public private partnerships with reference to Infrastructural projects and to analyse pros and cons of it.

### PPP in Indian Infrastructure

The Indian Infrastructure has been a subject for Indian and Foreign traders who're inquisitive about Investing in Indian Infrastructural projects. Perception approximately Indian

Infrastructure is meditated via Infrastructural score comparisons drawn with Brazil and China which suggests India has a protracted manner to move earlier than it reaches its friends in Infrastructure.

**Table 2:** EIU Infrastructure Development Ratings

Ranking/Rating	Brazil	India	China
2001-05 Rating (Out of 10)	5.4	3.1	4.5
2001-05 Ranking	47	75	55
2006-10 Rating (Out of 10)	5.9	4.1	5.4
2006-10 Ranking	49	75	54

For a country like India a sustained and Feasible Growth rate of 8-9 Percent is required to maintain global Competitiveness. The union government has estimated an

investment of \$320 billion in the infrastructure in the 10<sup>th</sup> plan to meet this Goal.

**Table 3:** Sector Wise Project Details

Sector-wise	No. Of Projects	Based on 100 Crore	Between 100 to 250 crore	Between 251 to 500 crore	More than 500 crore	Value of Contracts
Airports	5	-	-	303.0	18,808.0	19,111.0
Education	17	424.2	365.5	460.0	600.0	1,849.7
Energy	56	337.6	934.0	3,083.0	62,890.0	67,244.6
Health Care	8	315.0	343.0	275.0	900.0	1,833.0
Ports	61	86.0	1,745.3	4,304.8	74,902.1	81,038.2
Railways	4	-	102.2	873.0	594.3	1,569.6
Roads	405	4,364.6	11,696.5	38,520.5	122,143.3	176,724.9
Tourism	50	1,132.6	1,503.5	800.0	1,050.0	4,486.1
Urban Development	152	2,812.0	3,136.9	6,688.2	16,838.0	29,475.0
Total	758	9,471.9	19,826.9	55,307.5	298,725.8	383,332.1

We see that street tasks account for 53.4% of the whole wide variety of tasks and 46% with the aid of using general cost due to the small common length of tasks. Ports al even though account for 8% of the whole wide variety of tasks have a bigger common length of task and make a contribution 21% in phrases of general cost. It is noteworthy that if ports and principal street tasks are excluded from the whole, there may be in truth a notably small cost of deal flow, at best Rs 125,568.ninety three Crores in primary infrastructure PPPs to date, suggesting a enormous capability upside for PPP tasks throughout sectors wherein states and municipalities have number one responsibility. It is found that the capability use of PPPs in e- governance and

fitness and training sectors stays in large part untapped throughout India as a whole, even though off-past due there had been a few sports shaping in those sectors.

Across states and principal agencies, the main customers of PPPs with the aid of using wide variety of tasks had been Karnataka, Andhra Pradesh, and Madhya Pradesh, with 104, ninety six and 86 provided tasks respectively and the National Highways Authority of India (NHAI), with approximately a hundred and fifty five tasks. In phrases of foremost varieties of PPP contracts, nearly all contracts had been of the BOT/BOOT type (both toll or annuity fee models) or near variants.

### Indian Infrastructural Projects under Public Private Partnerships

#### Airports

SL. No.	Project Name	State	Cost(Cr)	Status
1	Hyderabad International Airport	Andhra Pradesh	2478	Under operations
2	Modernisation of Delhi Airport	NCR	8600	Construction
3	Cochin International Airport	Kerala	303	Construction
4	Modernisation of Mumbai Airport	Maharashtra	5800	Construction
5	Bangalore International Airport	Karnataka	12690	Under Operations

#### Ports

SL. No.	Project Name	State	Cost (Cr)	Status
1	Container Terminal at Visakhapatnam Port	Andhra Pradesh	108	Construction
2	Development of Berth no.7 for handling bulk cargo at Mormugao Port	Goa	252	Under Implementation
3	Multi- purpose cargo berths at Kandla Port	Gujarat	756	Construction
4	Mechanized Iron Ore Handling Facilities at New Mangalore Port	Karnataka	277	Under Implementation
5	Chennai Container Terminal	Tamil Nadu	400	Construction

## Roads

SL. No.	Project Name	State	Cost(Cr)	Status
1	Four Laning of Bangalore - Nelamangala on NH-4 with NH-48	Karnataka	441	Completed
2	MP/Maharashtra border to Nagpur	Maharashtra	1171	Under Implementation
3	Chennai Tada	Tamil Nadu	353	Construction
4	Ghaziabad-Aligarh	Uttar Pradesh	1141	Construction
5	Delhi-Gurgaon Highway	NCR	710	Completed

## Railway

SL. No.	Project Name	State	Cost(Cr)	Status
1	Gandhidham-Palanpur Railway Project	Gujarat	500	Under operation
2	Madhepura Electric Loco Factory		750	Under Implementation
3	Marhowra Diesel Loco Factory		750	Under Implementation
4	Port Connectivity & other RVNL projects		830	Under Implementation
5	Investment in Rolling Stock by Container Operators		2387	Under Implementation

## Urban development

SL. No.	Project Name	State	Cost(Cr)	Status
1	Theme Park Project, Hyderabad.	Andhra Pradesh	18	Completed
2	Hyderabad Metro Rail Project, Hyderabad.	Andhra Pradesh	12132	Bidding
3	Automated Parking-cum-commercial complex, Kamla Nagar, Delhi	NCR	109	Completed
4	Bidadi Integrated Township	Karnataka	40000	Construction
5	Tirupur Water Supply	Tamil Nadu	1023	Under Operations

## Tourism

SL. No.	Project Name	State	Cost(Cr)	Status
1	Development of International Convention Centre at Devanahalli	Karnataka	1040	Completed
2	5 Star Hotel at Guwahati	Assam	505	Construction
3	Airstrip and Civil Aviation Training 33.087hect	MP	8.21	Construction
4	Conversion of IMS Vikrant in to a Museum, Mumbai	Maharashtra	320	Completed
5	Development of A New Bridge Connecting Mattancherry and Willingdon Island at Cochin	Kerala	27	Completed

## Energy

SL. No.	Project Name	State	Cost(Cr)	Status
1	1000-1320 MW Coal based power plant	Karnataka	1500	Completed
2	GIPCL Vadodara & Surat	Gujarat	2000	Under operations
3	Paguthan Expansion Project	Gujarat	2000	Under Operations
4	60 MW thermal Power Project	Assam	235	Construction
5	Prayagraj Power Project at Bara, Allahabad	UP	10000	Construction

## Health Care

SL. No.	Project Name	State	Cost(Cr)	Status
1	Greenfield Super Specialty Hospital at Bathinda	Punjab	99	Construction
2	Greenfield Super Specialty Hospital at Mohali	Punjab	118	Construction
3	Punjab Institute of Medical Sciences	Punjab	225	Construction
4	Indra Gandhi Government Medical College (IGGMC) Complex	Maharashtra	275	Bidding
5	Setting up and Running Trauma Centre and Hospital at Yerwada, Pune	Maharashtra	1.5	Construction

**Advantages and Disadvantages of PPP Advantages**

**Value for Money:** The vital gain of PPP is the introduction of fee for money. This way handing over a task with the advanced nice for identical quantity of money.

**Risk Transfer:** Risk might be transferred to 0.33 percent who's first-class capable of control chance as a minimum fee.

**Private zone control skills:** This permits the task to be brought properly beforehand of time. By the use of PPP Government may have get admission to new skills.

**Competition:** Generally opposition is related to personal zone, like decrease prices, Innovative Practices, Increased

Investment, Better offerings etc.

**Cost Efficiencies:** PPP ends in fee efficiencies which can be due to improved opposition, improved share of chance transfer, and nearer integration of numerous aspects.

**Time to Delivery savings:** PPP initiatives may be brought faster than beneath Neath traditional procurement due to higher task control, higher control of task dangers and due to the fact the provider company isn't paid till the task is completed.

**Reduction on the general public Treasury:** PPP allows lessen the capital needs on the general public treasury for infrastructure improvement.

**Broad support:** PPP are extensively supported through central, kingdom and nearby bodies.

Innovation, Private zone task improvement skills, Transparency of process, Involvement of 0.33 percent financiers etc.

#### Disadvantages

**Higher transaction fee:** PPP's attempt to lessen general task fee, but trending prices and growing prices are usually higher.

**Lack of coordination:** As there are or greater events concerned in PPP there are possibilities of misunderstandings.

**Inefficiencies:** PPP can cause Inefficiency because of loss of contestability and opposition.

**Culture Gap:** There exists a tradition hole among public and personal zone which can also additionally bring about lack of self assurance in every other.

**Different Objectives:** The personal sectors purpose to participate in PPP is to specifically make income however the purpose of public zone is provider oriented.

**Corruption:** PPP initiatives are constantly at the back of the chance of corruption as there are too many human beings and methods concerned with inside the crowning glory of the task.

**Political and Legal Problems:** Changing Governments and main adjustments in regulation has from time to time a totally terrible effect on PPP initiatives.

#### Findings

In order to make PPP initiatives a hit in India, chance ought to simplest be transferred to the ones events who're first-class in dealing with it, due to the fact moving chance will bring about a large effect.

Over-specification and miss-specification of task end result can motive large damage. Hence, the authorities will should outline its goals, desires, ideas and necessities as simply as possible. The general wide variety of bidders ought to be sufficient to have powerful opposition, however ought to be confined on the way to have manage over transaction fee, nice of bids and chance of success. It is constantly higher to have standardized contracts on the way to keep away from transaction fee, delays and uncertainties.

In phrases of settlement award method, the global aggressive bidding yielded 35% of general funding in India accompanied through home aggressive bidding of 26%.

An impartial institutional shape for managing PPP applications in India must be installation to behave as a nodal employer with the obligation of introduction of PPP database, first-class practices and version files for all sectors.

There is a need for powerful distribution of obligation, prices and dangers among the private and non-private zone to fulfil their duties correctly which includes land acquisition, environmental clearance, kingdom support, etc. There are a terrific wide variety of initiatives beneath Neath Transportation, Airports, and Ports sectors, however there's a large beneath Neath-explored marketplace in sectors like Energy, Urban Development and Railways. There is an acute want for PPP initiatives in India to develop at a tempo of 8-9% to fit nations like Japan and China in phrases of

infrastructural improvement.

#### Conclusion

Considering India's infrastructural needs, PPPs aren't simply an option, however a necessity. It has been visible that PPP has many deserves which includes huge funding in public (each city and rural) infrastructure, green provider delivery, fee-effectiveness, contracts which can be performance-based, sharing of dangers, powerful use of belongings and possibilities of long-time period funding. Though a combined financial technique is accompanied through India, that is reliant on public personal involvement in financial activities, Public Private Partnership in infrastructure is now greater than a decade old. It appears to create giant fee to the Indian Government and its residents with recognize to enhancement in time efficiency, extra convenience, improved reliability and saving prices alongside with easy availability of information. However, there are numerous problems which want to be identified, addressed and resolved on the way to facilitate a higher know-how on using PPP in a higher manner to expand Indian infrastructure effectively.
